## PraxisDialog 13: Efficient Enhancement with Coating

The 13th PraxisDialog will deal with the many applications for coating in commercial printing.

Frank Kamphuis, Research and Development Manager at the coating manufacturer ACTEGA Terra, is to explain the optimal usage of coating in commercial printing. What is bound to be an interesting aspect is how coating can increase productivity and enable print products to be moved sooner to the finishing operations. How can I as a printer achieve the best enhancement results? What do I need to pay attention to with the system components? These questions will be answered during the subsequent print demonstration in the Offenbach Graphic Center.

### Registration by e-mail

The PraxisDialog will be held in German language and take place at Senefelder House and MAN Roland's Graphic Center in Offenbach on 24 January 2008 from 10 a.m. till 3 p.m. Participants only need to pay for their travel costs. Please register for the event by sending an e-mail to [praxisdialog@man-roland.de](mailto:praxisdialog@man-roland.de).

**MAN Roland Druckmaschinen AG** is the world's second largest printing systems manufacturer and the world's market leader in web offset. MAN Roland operates out of Offenbach and Mainhausen, Augsburg and Plauen in Germany. It employs almost 9,000 people and has annual sales of more than EUR 2 billion with an export share of almost 82%. Web and sheetfed offset presses provide solutions for publishing, general commercial and packaging printing.
